KozaK® AutoDrywash, The Original... Since 1926

The KozaK® cloth by LEXOL® is manufactured of specially selected cotton, by an ingenious, exclusive process. Each fold on a cloth is good for one to three car cleanings... thus providing easily between 50 to 100 DRY cleanings for any car. KozaK® cloths are woven to "specs", and carefully finished to a velvety soft material. The fibre is treated with a special formulation, safe for hands and for the car finish. KozaK® is used DRY on a DRY car. It not only quickly and completely eliminates the road dust film, the dried muddy-water splatter, the rain ugliness and grime... but everytime it is used it ADDS to the beauty and permanence of the original paint job.

303 Protectant

- **World's Best Protectant**
- **Maximum Sun Protection**

Unlike most popular protectant/ dressings, 303 Protectant is not silicone-based, so it doesn't leave a slippery film, doesn't attract dust, and doesn't dry out. What it does do is clean, renew and protect rubber, vinyl and plastic better than any other product we've found. Also provides maximum protection from harmful UV rays.

Forever BLACK™ TireGel

- *No More Faded-Bronze Look*
- *Brings Back Black In One Application*

Many tire dressings offer only a short-term new-rubber look. They typically attract dirt and turn sidewalls brown instead of the intended black. Forever BLACK™ is different: It's a gel that's specially formulated to outperform silicone-impregnated aerosol dressings. Water-based and environmentally safe, the gel applies with its bottle's applicator top, so the product can be spread evenly—whitewalls are easily avoided. Forever BLACK™ dries in about 10 minutes, restores the like-new black luster, protects against UV rays and lasts for months.

Schumacher Mity Mite Battery Charger

For Porsches® that aren't driven every day, or for storage during the winter, we use this compact, 1.5 amp 12 volt automatic battery charger. Just install in the car and leave it in place—then just plug it into any extension cord. It charges the battery whenever voltage drops by one volt. When the battery reaches full charge, it shuts itself off automatically to prevent overcharging. Charger includes on-off charging indicator. Porsche® now recommends such a battery charger, since all the newer cars come with more and more electronic components that never let the battery receive a full charge. Two-year warranty.

88-0158-2 **53.99 ea.**

*Genuine Porsche® Charge-O-Mat Battery Charger & Monitoring Device

The Charge-O-Mat is a primary switch mode battery charger with pulse maintenance for your Porsche®. A three step fully automatic charger. At the beginning of the charging process, the charger delivers an almost constant current to the battery, and the battery voltage increases to the set level of 14.4 volts. At this point, the charger switches to constant voltage, and the current supply to the battery is gradually reduced. If the battery is charged and the terminal voltage of the battery falls to 12.9 volts, the charger automatically starts the process again. The Charge-O-Mat is maintenance-free. Adapter required for use on vehicles without cigarette lighter.

Brushnut™ Lug Nut Brush

Made of space-age, polymer bristles, the tips are "feathered" to eliminate scratches. The brushes are hand-crafted using precision CNC controlled machines in the Silicon Valley. These are not gimmicks. These brushes are well thought out, precision tools that are made to last. They reach deep into wheel openings and scrub both the opening and the lug nut. They can also be used to clean narrow wheel slots and around tire stems. They are absolutely guaranteed not to scratch any polished wheel. The Lugnut Brush is available with a comfortable, ergonomic, handle for hand use or with a 3/8 inch, tri-lobed, shaft for use with any cordless drill.

A Paint Chip Repair Kit That's Simple & Works!

Maybe you've tried buying touch-up paint at the local auto parts store. You tap and maneuver the brush to get just enough paint on the tip, to address the first few chips on your hood. Ever so carefully, you dab the tip on each chip, hoping to stay 'within the lines', while watching the paint ooze beyond the area you intended to cover. You figure the paint will magically blend in once it dries. The next day you realize you gave your car a case of the measles, which now stand out more than the chips did. But not with our repair kit!

Dri-Z-Air

- *Keep Interior Dry During Storage*

Storing your car for the winter? Don't let moisture ruin that expensive interior of your Porsche®. Dri-Z-Air removes excess moisture out of the air and collects it in its own container. In humid climates it will actually pull out a cup of water in 3-4 days. This will protect your carpeting, seats, and the on-board electronics for Porsches® with fuel injection.

1978-1998 Aluminum Seat Switch Bezels

Aluminum seat switch bezels are a sure way to brighten up your car's interior and make it stand out in a crowd. Unlike any product on the market, these bezels are a direct replacement of the factory plastic units found on most 1978-98 Porsche® with power seats. Simply unscrew the original and install these in their place for a 2 minute interior upgrade. Sold in sets of 2 and are available for most factory seats with a 2 switch configuration.

HalGuard™ Extinguishers

- *No Mess Or Damage To Vehicle Or Surfaces*
- *UL-Listed*
- *EPA-Approved – Made In U.S.A*
- *Liquefied Gas Extinguishes Hard-To-Reach Fires*

H3R Performance offers four HalGuard™ clean agent extinguishers. A "Clean Agent" is an electrically non-conducting, liquid or gaseous fire extinguishing agent that does not leave a residue. Clean agents have long been the product of choice for protecting classic automobiles and race cars - not to mention aircraft, computer rooms, and other high tech equipment.

Max Out™ Extinguishers

- *UL Listed*

Designed specifically to handle the types of fires likely to occur in an automotive environment. Using special non-toxic dry chemicals, Max Out™ Fire Extinguishers instantly work to break the chain reaction causing the fire. Max Out™ Fire Extinguishers are effective against fires involving flammable liquids and pressurized gasses, and are designed to not conduct electricity back to the operator. 2.5lb Max Out™ extinguishers are United States Coast Guard approved.

H3R Extinguisher Mounting Hardware

- *NHRA - Accepted Billet Mounting Accessories*

Here's a new fire extinguisher mounting solution from H3R Performance, that combines style and versatility. First, you start with the Band Clamp to fit either your 2.6" or 3.0" diameter fire extinguisher. Second, you combine it with the flat surface mount or a roll bar mount bracket. Finally, a quick release pin (included) holds both units together. Nicely finished in CNC-machined brushed aluminum.

Fire Extinguisher Mounts

- *Tig-Welded, Type 304, Stainless Steel*
- *Lightweight*
- *Holds One 2.5lb. Extinguisher*
- *Attaches To Factory Seat Track Hardware*

PCA driving events require cars to be equipped with a 2.5 lb. extinguisher within easy reach of the driver. (Requirements aside, it's a good idea to have a fire extinguisher in any expensive car.) Our mount conveniently locates the extinguisher in front of the driver or passenger seat. It moves with the fore/aft seat adjustment and thereby remains out of the way. Application specific for most Porsche® models.

Ace Spyder Alloy Wheel

Ace Alloy Spyder Wheels are one of the most impressive wheel values you'll find anywhere. Precision cast out of high-strength aluminum alloys, these affordable wheels are strong and light, featuring an open 10-spoke design that not only affords excellent brake cooling, it shows off those large Porsche® brakes for the ultimate gear head look. They are available in Bright Silver powder coat with a diamond-cut machined lip or in Hyper Black powder coat; a wild translucent coating that color shifts depending on the light. The Powder coat finish and open spoke design makes them easy to clean. Fitments for 993, 996, Boxster® and Cayman™. Some vehicles may require spacers.
